Subject: Resign!

Dr. Jacobs: you should ***resign*** your position at NOAA for its shameful politicization of the science of weather in criticizing the National Weather Service for confirming the truth of its early Hurricane Dorian predictions when President (and the term is used loosely) Trump falsified a National Weather Service map (a federal crime, by the way) for ostensible political gain. How brown is your nose becoming? (and I don't mean from being out in the sun) Disgusting!
